

Nurse Navigation Included

PenRad's Navigator workbook is included in PenRad for mammography and PenLung for lung nodule tracking to provide access to those involved to track, record, and plan the patient's journey as additional evaluation is required.

The workbook facilitates recording and tracking of the sequential progression of each procedure or event for the patient's journey. Ranging from; additional imaging, to biopsy, to cancer board, to various therapies, to surgery and reconstruction.

The workbook facilitates the capture of the scheduled and completed dates of each event, including the providing party and outcome.

The workbook facilitates the capture patient's medical and supporting contacts information.

The workbook progression documentation can be shared with the various parties involved. This allows others to respond to requests when the Navigator is not present.

The Navigator workbook optimizes productivity.

The Navigator workbook facilitates attaching documents and files to the patient, for example; cancer board, procedures conducted outside of the imaging center, lab reports during treatment.

Navigator's worklist offers reminder schedules and task completion lists for patients. This allows immediate review by day and/or week outlook, optimizing navigators time. Also, quick access is provided to the patient folder with a simple right click to document progress, for example; post biopsy follow-up for possible complications.

For facilities offering Genetic consulting or arranging, the Navigator workbook also assists in the process. PenRad's rich patient medical and risk system collects family cancer history, and automatically computes genetic testing eligibility with multiple models, optimizing time.

The screenshot shows a software window titled "Navigator form" with a light blue header. Below the header, there are input fields for "Next Reminder Date" (02/07/2019) and "Description" (mass right breast). The main content area is divided into sections by "Add" buttons:

- Additional Imaging:** A table with columns "Description", "Side", "Scheduled", "Completed", and "Ent By".

Description	Side	Scheduled	Completed	Ent By
