

PenXpress

Remote patient check-in with their own device

PenRad's GateKeeper technology reduces social distancing concerns, patient anxiety and expense. Patients can now check-in remotely with their own device and proceed directly to imaging. Use PenXpress with PenRad, PenTrac, PenLung, and PenAlert systems, to eliminate paper and expense.

PenXpress Benefits

PenXpress offers facilities the ability to send patients an access link correspondence providing patients the opportunity to update electronic forms (PenForms) anywhere with internet access, at their leisure on the device of their choice, reducing hygiene concerns.

PenXpress offers before arrival: registration, HIPAA consent, COVID questionnaire, insurance and address updates, consent forms, medical and risk history updates, email sign-up, instructions for arrival, breast center journey and procedure videos. All completed in advance, minimizing staff contact, adding efficiencies for the technologist, all while reducing patient anxiety.

Are you contemplating another service for your patients?
Now clinics have the ability educate and analyze the response and act to improve patient satisfaction and revenue.

PenForms

With minimal costs, and full automation, get an update remotely from patients on their medical history and risk factors. Use PenForms in the clinic or remotely, to engage patients with facility services:

- Increase patient engagement
- Digital patient consent, history, insurance forms, etc.
- Patient surveys, without paper handling
- Deliver educational videos about exams, reduce patient anxiety, allow staff to focus on patients
- Expand revenue by marketing services
- Facilitate social distancing and optimize patient flow
- Creates additional value for patients and relatives
